PROFESSIONAL SUMMARY

Regulatory Affairs & Quality Assurance Specialist with 2+ years in QMS, CAPA, and medical device compliance, driving regulatory strategy across product development lifecycles. Skilled in Pre-Submission, 510(k), and global dossiers coordinating with health authorities across FDA, Health Canada, and international markets. Proficient in EU MDR, UDI, post-market surveillance, and risk management per 21 CFR Part 820 and ISO 13485. Cross-functional leader driving CAPA initiatives for audit-ready, compliant product launches.

EDUCATION

Northeastern University | Boston, MA

Aug 2026

Masters of Science in Regulatory Affairs (Biopharmaceutical)

- Coursework: Regulatory Compliance, USFDA Regulations, eCTD, and Therapeutic Product Development.

Gujarat Technological University | Gujarat, India

May 2024

Bachelors of Pharmacy

- Coursework: Biostatistics, Biopharmaceutics, Microbiology, Pharmacology, Organic & Inorganic Chemistry.

TECHNICAL SKILLS

Quality : ISO 13485, 21 CFR Part 820, CAPA, NCMRs, Document Control, SOPs, Batch Record Review, Audits, CoA/CoT, OOS/OOT

Regulatory: Regulatory Submissions (FDA, Health Canada, CDSCO), CE Marking, EU Directives, GSPRs, 510(k), UDI/GUDID, STED, Post-Market Surveillance (PMS), Risk Management Files (RMF), MDSAP, GxP, HIPAA, Recall, IND, NDA, Adverse Events, MedWatch

Clinical: eCTD, CTA, Submission Dossiers, Pharmacovigilance, IBs, EC, Project Management

Software: TrackWise, CompliantPro, DocuWare, QT9, Veeva Vault, SAP, EDMS, MS Office, Adobe Acrobat, ZenQMS, MDRIM, SharePoint

PROFESSIONAL EXPERIENCE

Regulatory Affairs Intern | Meridian Technologies, Charlotte, North Carolina

Apr 2026 - Jun 2026

- Identified De Novo as appropriate FDA authorization route for novel AI-enhanced Class II IVD liquid biopsy device by documenting substantial equivalence gaps against 510(k) predicates per 21 CFR 807.87(f), supported by a mapped Technical File submission outline.
- Supported De Novo strategy for an AI-driven liquid biopsy system by conducting DHF gap analysis and preparing an eSTAR submission package across clinical, software, and labeling sections.
- Applied FDA AI/ML SaMD guidance to draft a PCCP governance framework for an adaptive ML classifier (CNN + XGBoost), ensuring compliance with IEC 62304 Class C software lifecycle requirements and De Novo special controls per 21 CFR 860.260(c).

Regulatory Affairs Intern | Reichert, Ametek Industries, Buffalo, NY

Sept 2025 - Mar 2026

- Maintained and updated EUDAMED UDI records for Class I and II devices to ensure full EU MDR compliance.
- Spearheaded QMSR gap assessment across 10+ QMS procedures, including Design & Development, Complaint Handling, and the Quality Manual, redlining and revising documentation to align with 21 CFR Part 820 and strengthen regulatory readiness.
- Coordinated and compiled regulatory documentation for global submissions, supporting technical files, IFUs, and registration packages across FDA, Health Canada (CMDR), and international markets (STED). Maintained training records and supported training matrix
- Supported product recall readiness by performing an end-to-end review of the EU Vigilance Procedure against EU MDR 2017/745 requirements, identifying compliance gaps and driving procedural updates to strengthen PMS and regulatory response capabilities.
- Migrated and archived 5,700+ compliance records from CompliantPro to DocuWare, ensuring traceability for complaint handling while collaborating with Quality, Manufacturing, and Engineering teams to support supplier audits, inspections, and regulatory inquiries.

Regulatory Affairs Associate | Vital Formulation Inc. Gujarat, India

Dec 2023 - Aug 2024

- Owned CMC and clinical regulatory submissions (21 CFR 210–211, HIPAA) with CoA/CoT generation to support timely product release.
- Performed risk assessments and triaged quality events including OOS/OOT deviations per SOPs, escalating to CAPA as appropriate.
- Led cross-functional teams to resolve over 15 quality and compliance issues through strategic CAPA implementation, contributing to a 35% decrease in repeat deviations and a 20% increase in audit preparedness. Sterility & Biological Testing/Validation

Quality Assurance Associate | Stride Industries, Gujarat, India

Jul 2021 - Aug 2022

- Participated in supplier audits and evaluations ensuring ISO 13485 compliance for incoming raw materials; monitored critical quality attributes for batch record accuracy, regulatory traceability, and documentation consistency through SOP adherence.
- Evaluated 1,000+ batches of bisoprolol fumarate, reducing errors and reported deviations and supported timely resolution. Also assisted in Verification & Validation protocols, IQ/OQ/PQ, & test execution contributing to material and batch disposition decisions per cGMP.

PROJECTS

eCTD Regulatory Submission Project

- Engineered a comprehensive eCTD submission framework integrating FDA and ICH guidelines across Modules 1–5 (clinical, nonclinical, CMC), optimizing workflows and improving document navigation efficiency by ~30% in compliance with global submission standards.

FDA Breakthrough Therapy: Fast-Tracking Biologics in Oncology

- Critically appraised FDA and EU Breakthrough Therapy pathways, emphasizing clinical evidence, regulatory flexibility, post-market surveillance, and legal-ethical implications of expedited oncology approvals.
